

International NewSpace

A sampling of projects around the world

Europe:

ARCA Stabilo - Romanian group is developing this balloon launched suborbital rocket.

EADS Astrium rocket plane – A giant aerospace firm but space tourism plan is novel.

Isle of Man – Commercial space friendly. Excalibur Almaz, Odyssey Moon projects.

Project Enterprise – Swiss, German privately funding rocketplane project. 2011 target.

Reaction Engines – Alan Bond's company pursues innovative propulsion systems.

Spaceport Sweden – Base for Virgin Galactic SS2 flights. See aurora up close.

Surrey Satellite – Low cost satellites, e.g Giove-A.

East Asia:

C&Space – South Korea. LOX/LNG engine. Sounding rocket & space tourism vehicle plans

JAXT RVT – Now working on an unmanned reusable high altitude suborbital vehicle.

Singapore Spaceport – Announced with fanfare but seems to be in limbo.

Canada:

PlanetSpace – Silver Dart (FDL-7) for suborbital/orbital. Nova Scotia spaceport.

[**Odyssey Moon** – A mostly Canadian project, though registered in Isle of Man.]

Russia:

ISS Tourism – Richard Garriott to fly in fall. Seat availability uncertain afterwards.

Explorer – Air launched vehicle with Space Adventures. Status unknown.
